

# Western Wood Structures, Inc.

## Custom Fabrication Services

Heavy Timber Truss Assembly - Timber Bridges - Resawing - Round Stock - Bevel Plate - Corbels

Western Wood Structures, Inc. (WWS) was incorporated in 1969 as a structural wood products sales & engineering company, specializing in engineered wood systems. Today, our product line includes the design, sale & installation of timber bridges, wood roof structures, VARAX domes, wood-I-joist systems, Tectum roof deck, FiRP® and conventional engineered glulam beams & arches, as well as the inspection & structural repair of distressed timber beams & trusses. WWS is pleased to offer this in-house custom fabrication service to our customers.
